

COAPS

Commander Open Architecture Panoramic Sight

COAPS is an advanced, modular dual-axis stabilized sight for MBTs and AFVs. Based on open architecture, it is easily adaptable to sensor additions/changes.

Main Advantages & Features

- Facilitates long-range target acquisition day and night, in both stationary and mobile situations
- Wide range of advanced sensors, including 3-5 μ m or 8-12 μ m thermal imagers, color zoom camera and eyesafe laser range finder (ELRF), as well as:
 - Built-in electronic unit
 - Independently stabilized dual-axis
 - Dedicated ballistic protection
- Independent 360° panoramic view
- Provides hunter-killer capabilities with the turret system through the existing GMS

Applications

- Fire control computation
- Long-range target acquisition
- Independent surveillance
