

# Fixed Wing Solutions

Your Platform - Our Advanced Capabilities

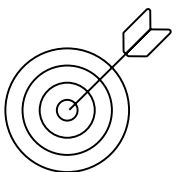

## A Holistic Approach to Cutting-Edge Innovations

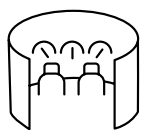

When it comes to ensuring seamless connectivity, enhanced mission effectiveness and increased survivability, Elbit puts to work its accumulated combat experience and technological know-how to deliver advanced, integrated, high-performance aircraft solutions to customers around the world.

Recognized as the global expert in military aircraft solutions and upgrades, Elbit's cost-effective solutions are built on a robust, open, and modular platform with extended service life.

### Experience & Expertise that Offer Flight Efficiency and Safety:

Improved Operational Effectiveness & Lethality

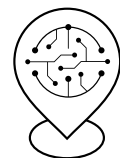

Train as you Fight

Increased Survivability

Agile Introduction of New Capabilities

Reduced Pilot Workload

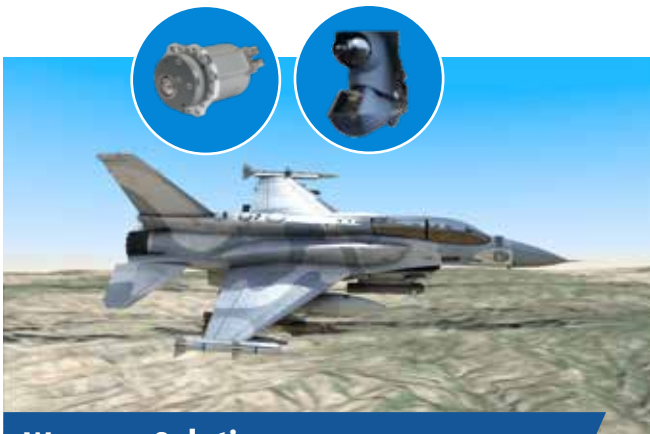

### Cockpit Solutions

Advanced avionic & Pilotage Vehicle Interface (PVI) for intuitive HMI

### Mission Suites

Advanced AI-based operational applications (DAS, TF/TA) with additional growth capacity

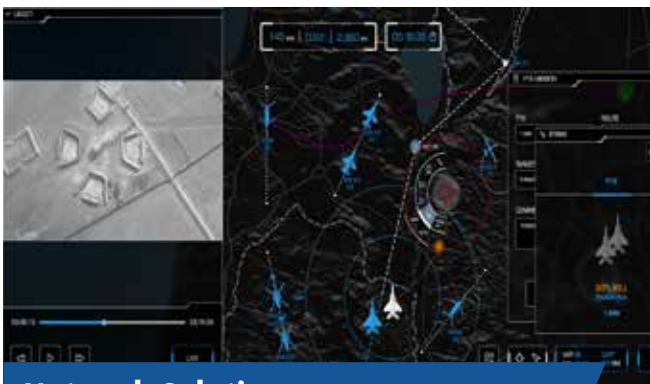

### Weapon Solutions

Integration of new and advanced systems for improved lethality and increased survivability

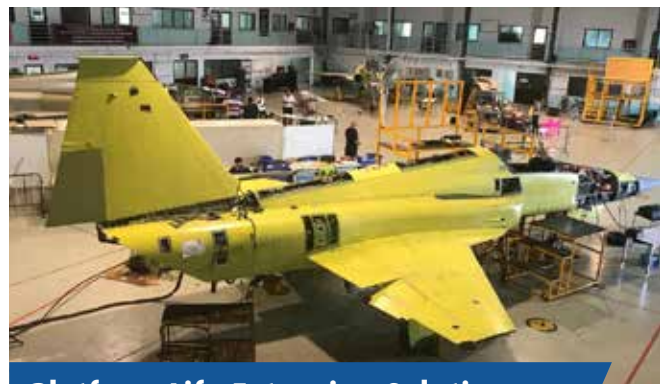

### Training Capabilities

Embedded Virtual Avionics (EVA™) connected via Data Link for advanced live training

### Network Solutions

Fused Situational Awareness (SA) & mission-configurable cockpit for reduced pilot workload and increased survivability and mission efficiency

### Platform Life Extension Solutions

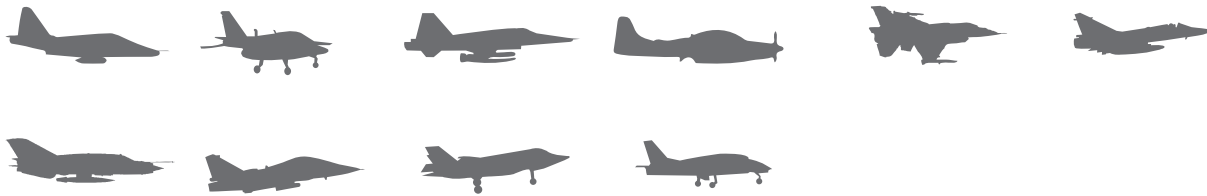

# Fixed Wing Solutions

## Our Advanced Capabilities - Your Benefits

Elbit Systems Ltd. is an international high-technology company engaged in a wide range of defense, homeland security and commercial programs throughout the world. The Company, which includes Elbit Systems and its subsidiaries, operates in the areas of aerospace, land and naval systems, command, control, communications, computers, intelligence surveillance and reconnaissance ("C4ISR"), unmanned aircraft systems, advanced electro-optics, electro-optic space systems, EW suites, signal intelligence systems, data links and communications systems, radios and cyber-based systems. The Company also focuses on the upgrading of existing platforms, developing new technologies for defense, homeland security and commercial applications providing a range of support, including training and simulation systems.

## Upgrades of Eastern and Western Platforms

### Fighters & Trainers
