

# Mini Lizard

Gliding guided munition for light attack and mission aircraft

# Mini Lizard

## Gliding guided munition for light attack and mission aircraft

The Mini Lizard is an affordable, accurate precision-guided gliding weapon, ideal for light attack and mission aircraft.

### System Overview

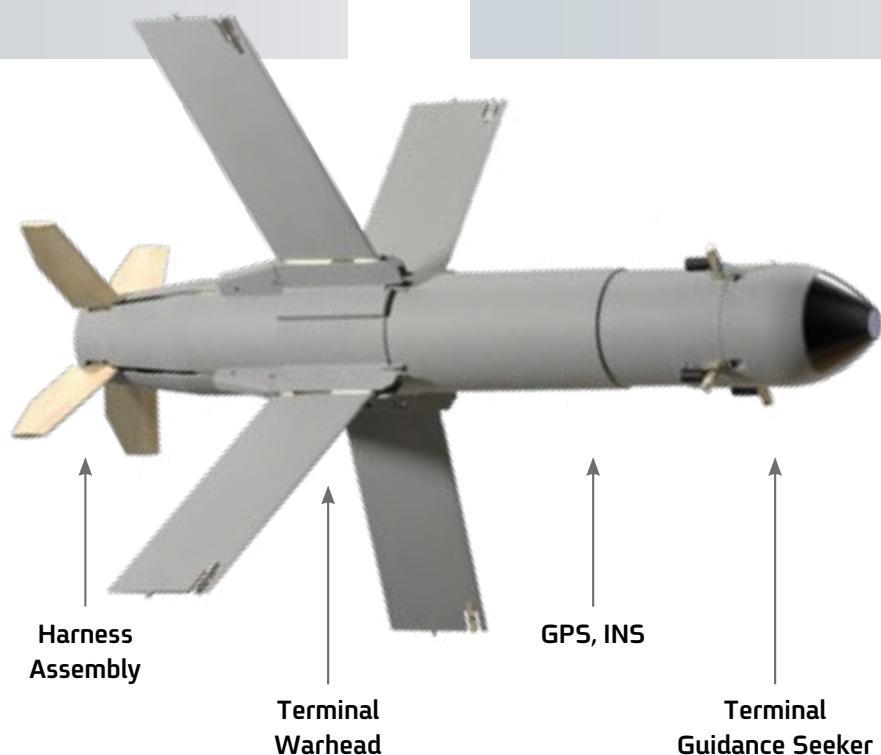

A fully integrated solution equipped with advanced technologies, the Mini Lizard offers superior precision with excellent performance, suitable for day and night operations. The guided munitions carry a 9 kg payload and features semi-active laser (SAL) and/or GPS guidance, with a glide ratio of 4:1 and omni envelope (360°). The system provides highly reliable moving targets acquisition capability for a wide range of targets including light armored vehicles. Mini Lizard is compatible with all laser designators.

#### Key Features

- Semi-Active Laser (SAL) guidance/optional GPS
- Large envelope: gliding ratio 4:1, omni envelop (360°)
- Moving target capability
- Payload up to 9 kg

#### Key Benefits

- Minimal collateral damage
- Day/night capability
- Compatible with all laser designators
- Affordable
