TerminaTHOR: Revolutionizing Aerial Combat with Precision and Versatility
The TerminaTHOR is a game-changing Tactical air drop munition system, designed to revolutionize combat operations from above. In a landscape prioritizing speed, precision, and versatility, TerminaTHOR empowers infantry squads and elevates combat effectiveness.

Rapid-Deploy Weaponry for Almost All Battlefields
TerminaTHOR supports diverse operational scenarios, featuring a powerful foldable, backpacked platform capable of operation in various weather and terrain conditions. Equipped with autonomous takeoff, precision landing, and autonomous mission flight capabilities, TerminaTHOR offers an agile, compact, and fully stabilized weapon system.

Designed to extend infantry squad lethality, TerminaTHOR excels in stand-off warfare, swiftly engaging low-signature enemies across multiple combat scenarios. Whether in urban, force protection, or border defense operations, TerminaTHOR delivers unmatched performance and adaptability. With its advanced capabilities, TerminaTHOR enables fire loop closure, ensuring a swift and decisive response to manned threats or light armored vehicles on the battlefield.

TerminaTHOR™

Tactical air drop munition system

Main Applications

- **Force protection:** Safeguarding personnel and assets in high-threat environments.
- **Combat in urban terrain:** Navigating complex urban landscapes with precision and efficiency.
- **Combat of special forces:** Providing elite units with the firepower needed to accomplish critical missions.
- **Combat in open terrain:** Securing vast expanses with rapid response and firepower.
- **Border defense:** Maintaining border integrity and deterring hostile incursions with vigilance and readiness.

Technical Specifications

System	
Max Operational Altitude	600 meter AGL
Range	10 km/20 km Omni/directional antenna
Operational Speed	0-70 Km/h
Maximum Takeoff Weight (MTOW)	<25kg
Data Link	S-Band
Total Payload Weight	9.5 kg
Endurance	40 min
MIL-STD	810 F
Ammunition	
Munition Type	Elbit's M66-based bomb
Ammunition Weight	1135 g
Safe and Arm	Electronic
Storage Temperature	-46 - +71 degree
MIL-STD	810F

Key Benefits

- **Autonomous mission and flight**
- **TRL9 solution**
- **Military tactical bag-packed solution**
- **Safe & arm with abort capability**
- **Organic lethality for Seek & Strike missions**
- **Fast reaction and precision engagement** against a low signature enemy.
- **Enhanced Lethality:** superior performance in urban terrain, force protection duties, and border defense operations.
- **Lightweight system** designed to be carried, deployed and operated by a single soldier.

Key Features

- **Elbit's M66 based bomb:** Ensures lethal precision with each strike.
- **6 bomblets in each pod:** Maximizes coverage and effectiveness against dispersed targets.
